PROJECTS

@todayilearnedbot

An Instagram bot that scrapes from r/todayilearned and posts facts daily, Made using Python and hosted on an EC2 instance. Can be found on Instagram as @todayilearnedbot

Chocolini E-Store

Developed a Single-Vender E-Commerce store in C# ASP.NET from scratch and deployed it to an AWS EC2, which can be reached at <https://www.chocoliniestore.com/>

Trash Classification Bot

A smart bot which picks up trash, identifies it into sub-category of trash and places it in respective section. Implemented the Computer Vision aspect of this project.

Electronic Health Record System

A web platform built using the LAMP stack to record the details of a patient and secure it using a Facial Recognition based log in system. A verified doctor could add prescription.

Interactive ASMR game in Virtual Reality

Developed using Unity, this game allows the player to roam around in French villages as the voice of Stephen Fry narrates a story and helps them relax.

NoSleepApp

App to scrape data from r/NoSleep, pack it as an API and import into the Android app as JSON.

EEG based Game for improving concentration

The more the player concentrates in the game, the higher power they acquire in this 3D Fighter Game.

AR-Based Guide Tour for University

Made in Unity using Mapbox API for Android and iOS.
